

First International Berry Health Benefits Symposium

June 13-14, 2005

Corvallis, Oregon USA

La Sells Stewart Center, Oregon State University

Sponsored by

Department of Food Science & Technology, Oregon State University

The Linus Pauling Institute

The Oregon Raspberry & Blackberry Commission

The US Highbush Blueberry Council

The First International Berry Health Benefits Symposium will focus on the growing body of scientific knowledge which establishes that dietary intake of berries has a positive and profound effect on human disease prevention. This dynamic symposium will offer excellent networking opportunities to those in the scientific community as well important information for food writers and health and wellness professionals. The symposium will allow attendees to examine compositional elements and biochemical activities of berries and their relationship to the multitude of observed health benefits

A list of confirmed speakers includes:

Ron Wrolstad, Oregon State University

Luke Howard, Ron Prior, University of Arkansas

Mary Ann Lila, University of Illinois

Wilhelmina Kalt, Agriculture and Agri-Food Canada

Marina Heinonen, University of Helsinki

F.A. Tomas Barberan, CEBAS (CSIC), Murcia, Spain
